How to get started with EchoRewards

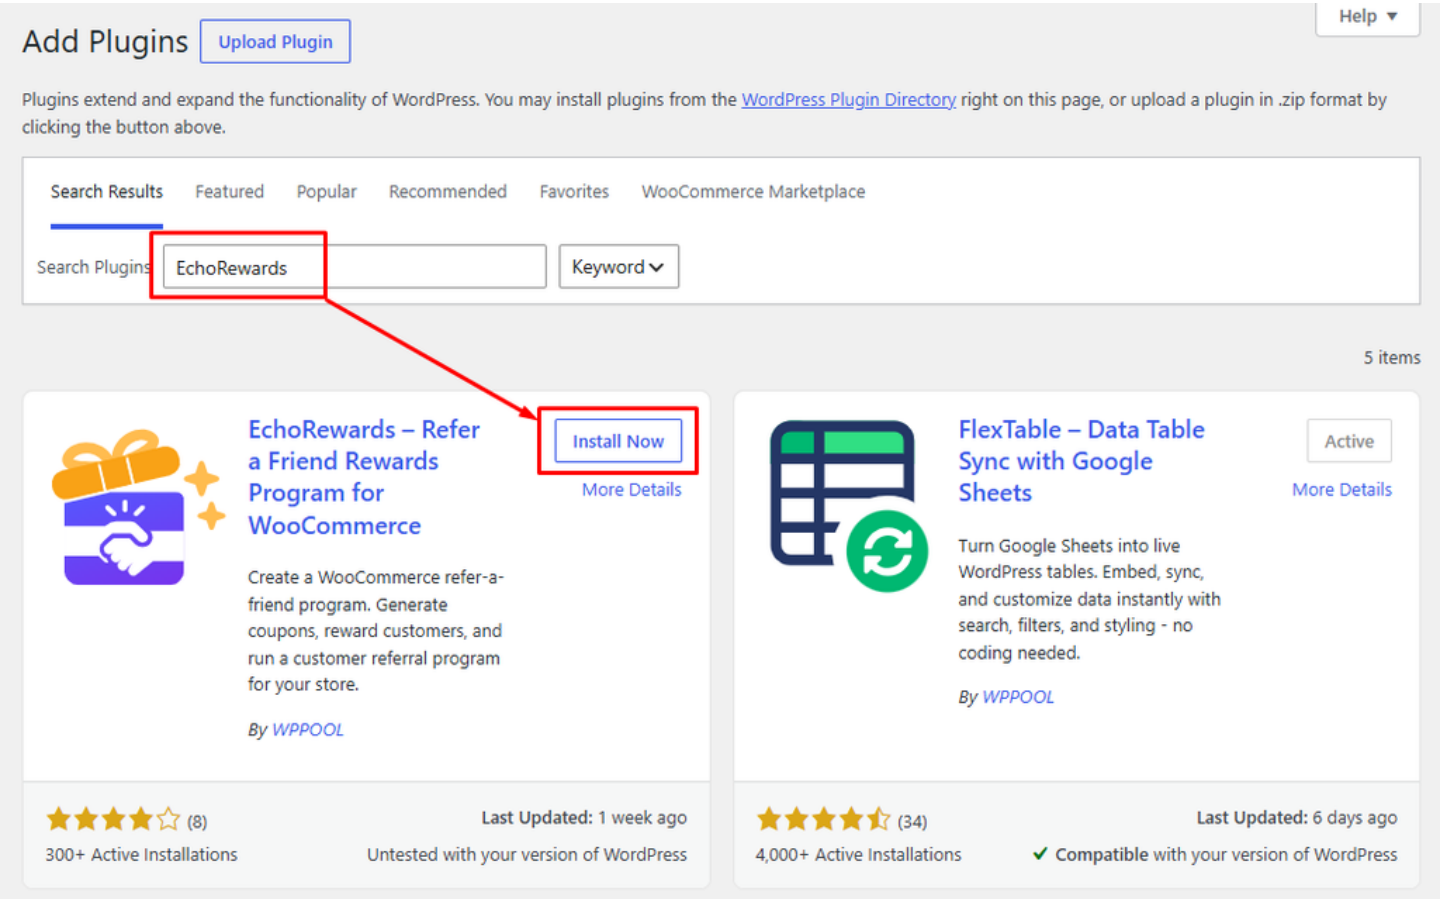
EchoRewards Docs · https://echorewards.pro/docs/how-to-get-started-with-echorewards/

Installing the Free version

EchoRewards is available for free on ***WordPress ORG***. Follow the following steps to get started:

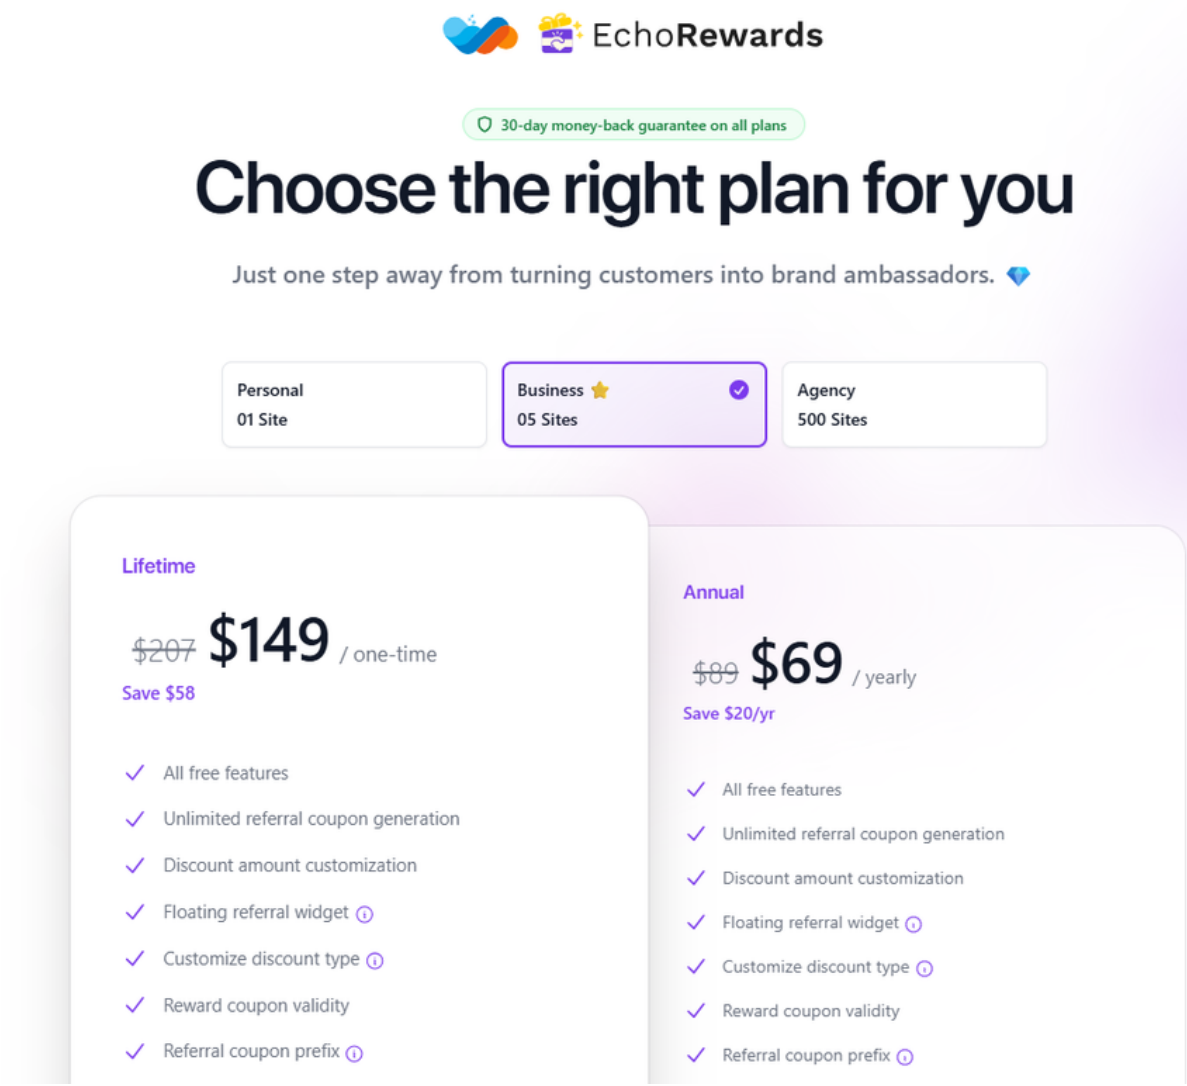
Go to **WordPress Dashboard > Plugins > Add New Plugin** and search for "**EchoRewards**".

Select **Install** and **Activate** the plugin.

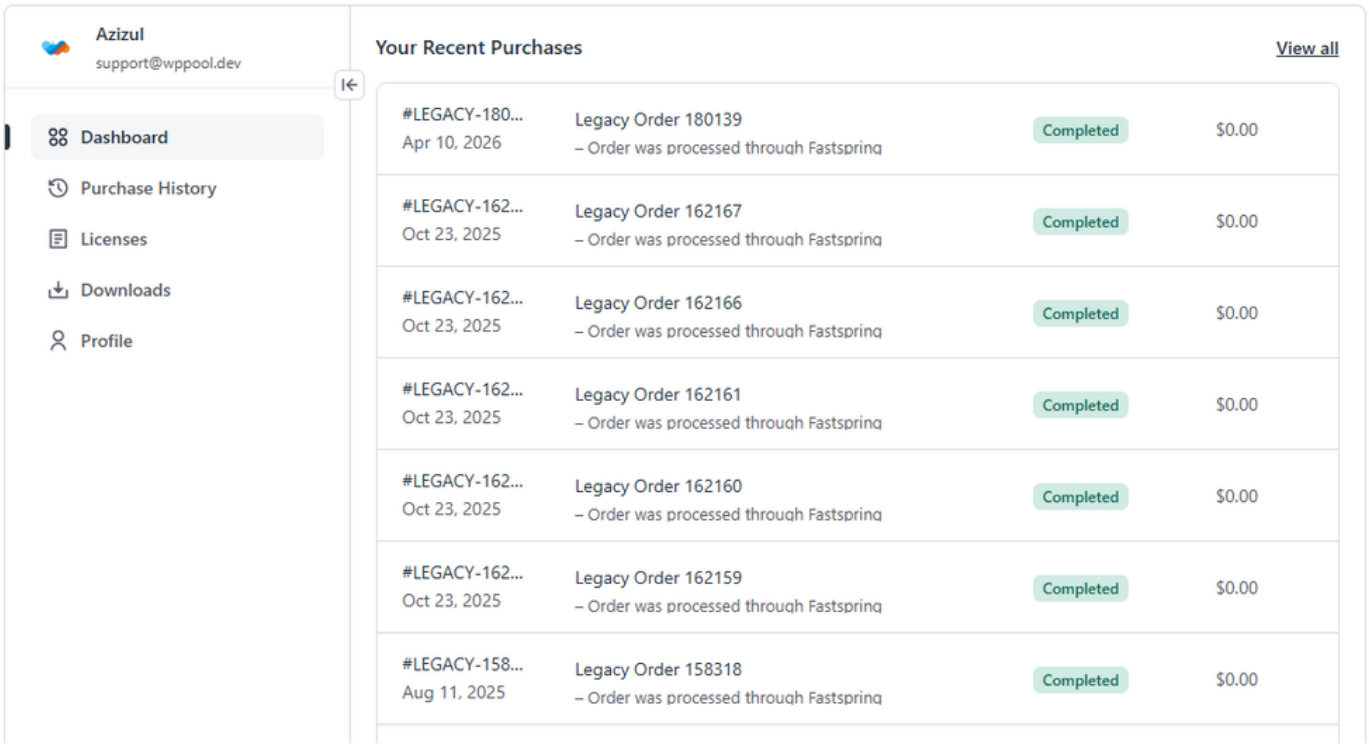


Installing the Pro version

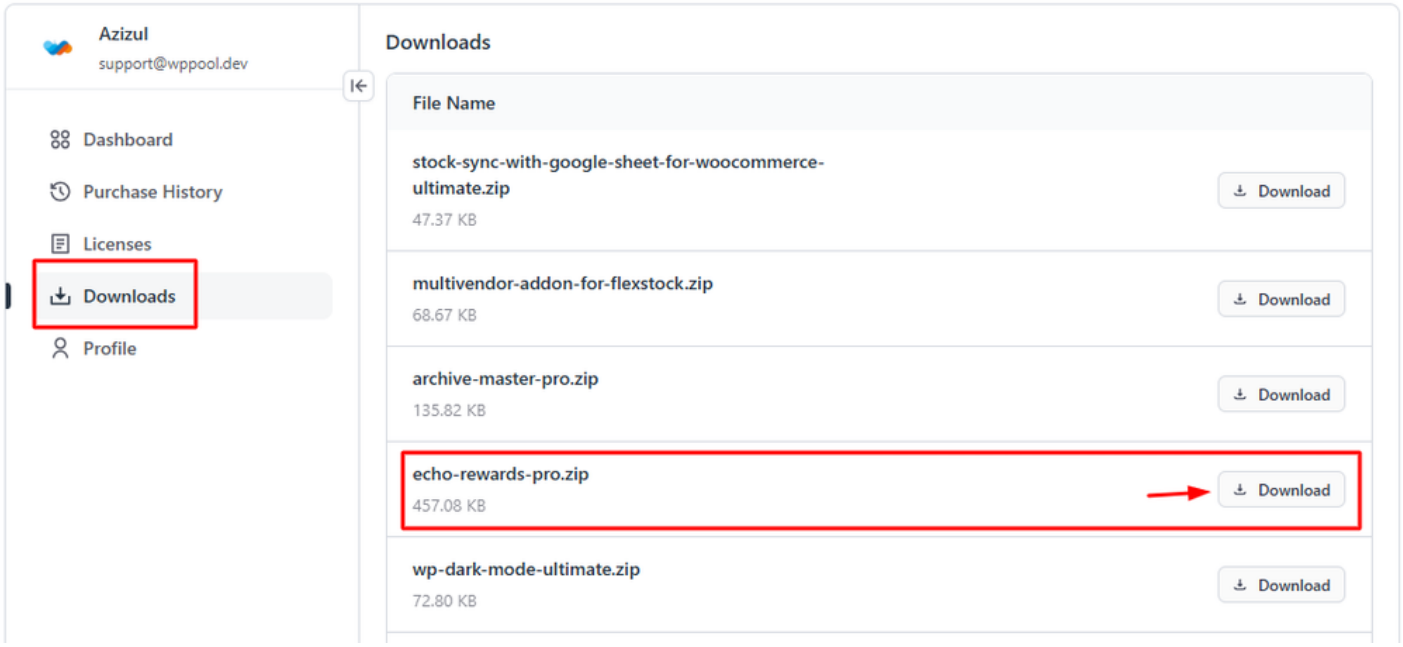
Go to ***EchoRewards's Pricing*** and buy the plan you like.



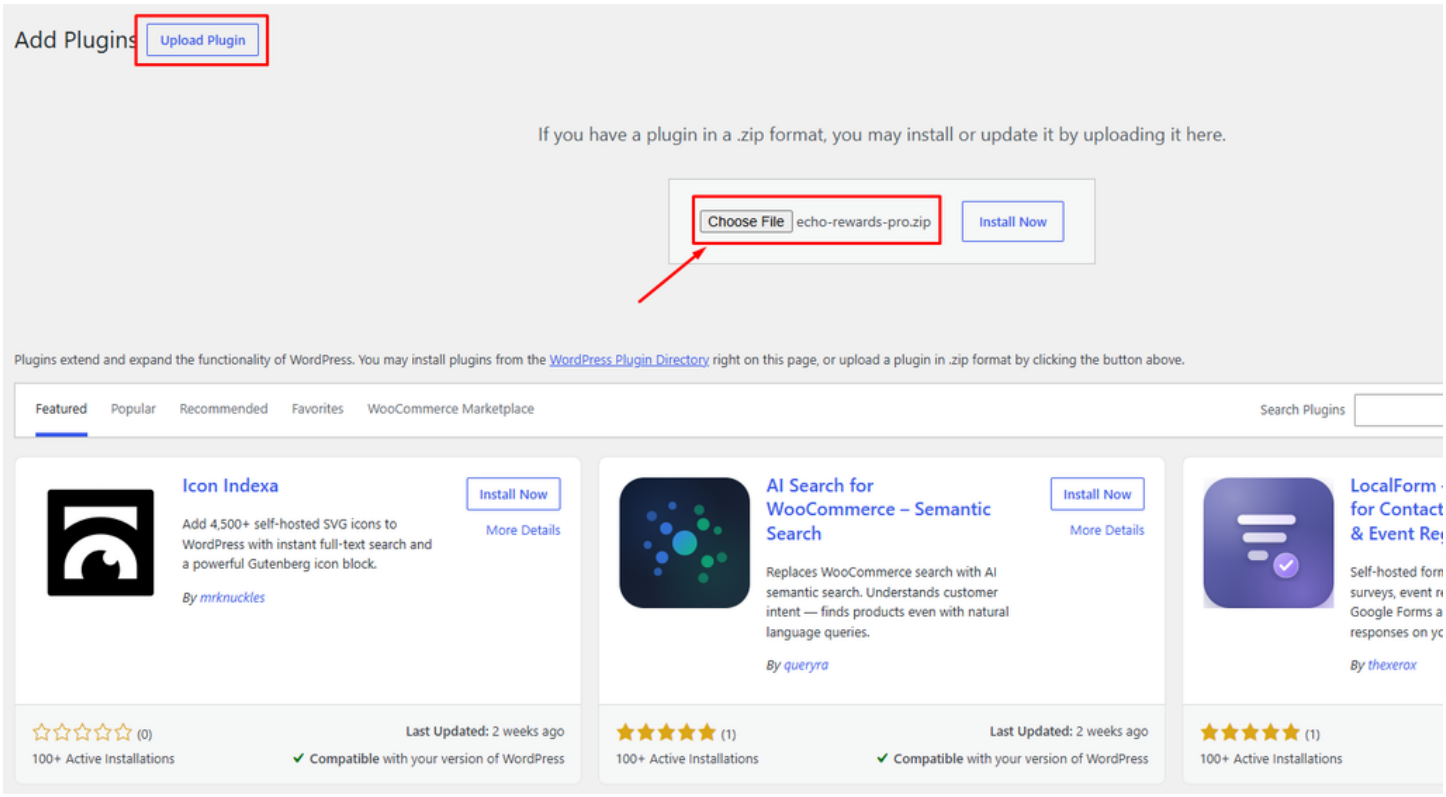
Once you have purchased EchoRewards Pro, you will receive an email containing the Pro version of the plugin alongside your license. For that, go to the ***WPPOOL Portal***.



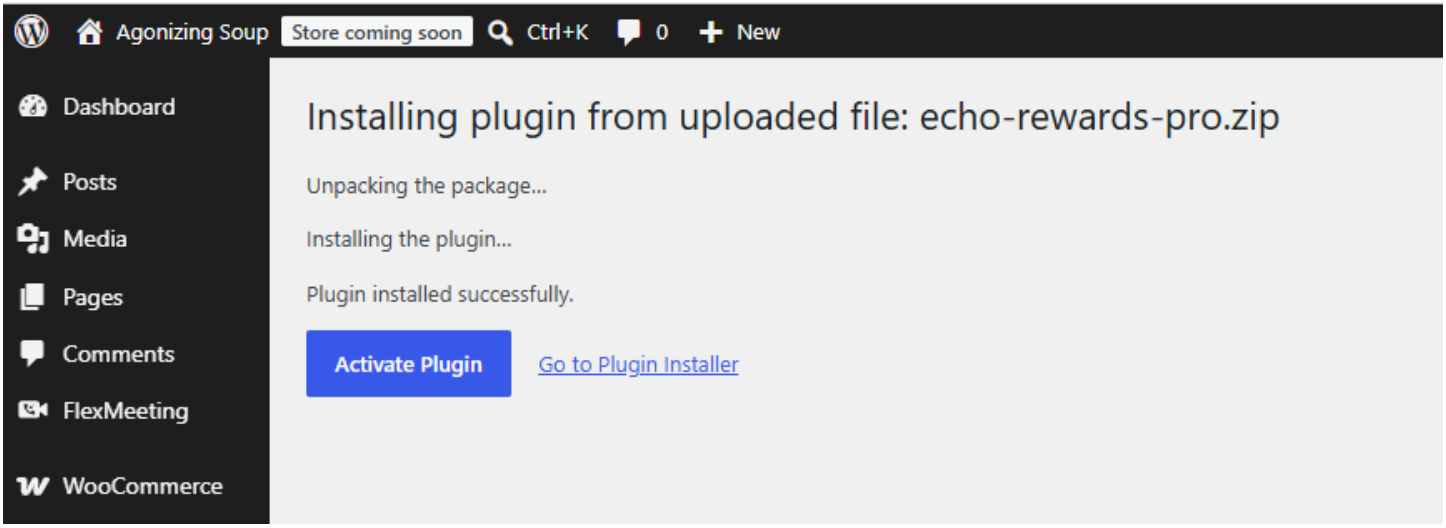
Then go to ***My Account > Downloads*****.** You should see your EchoRewards Pro plugin available for download.



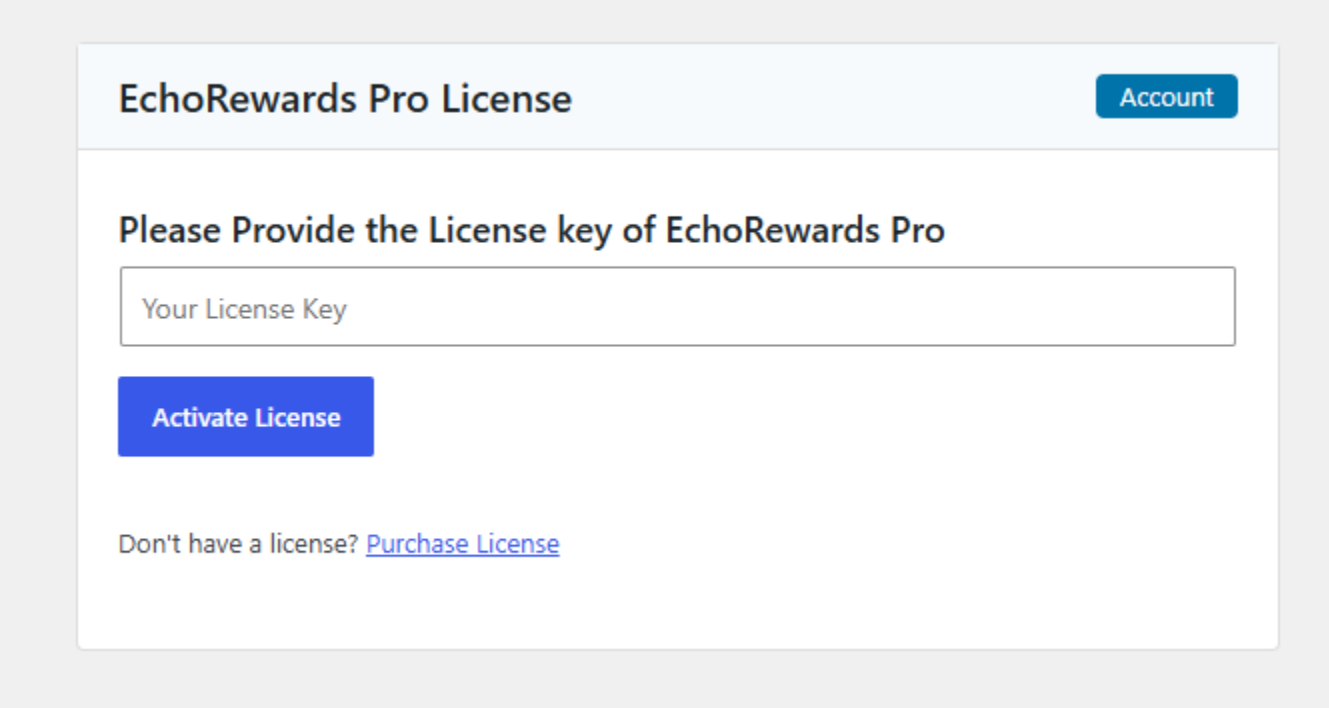
Download the Zip file and then upload the file by navigating to **WordPress Dashboard > Plugins > Add New Plugin.**



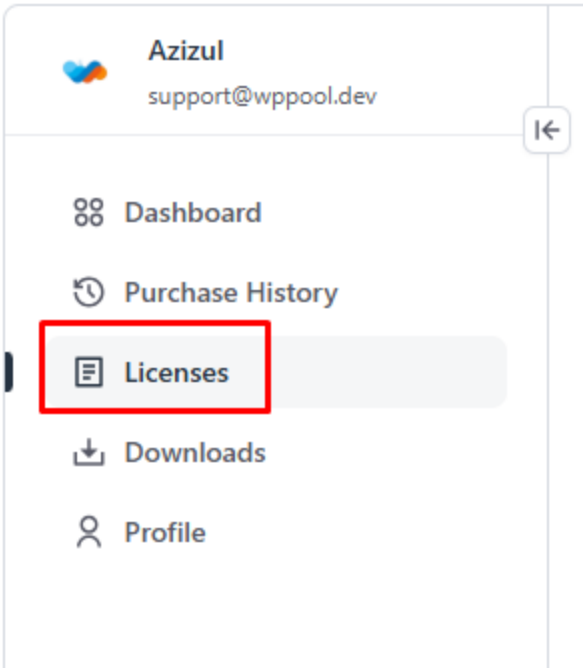
Install and Activate the plugin.



It will ask for a license key right after the Pro plugin activation.



Go back to ***WPPOOL >My Account > Licenses***. You should be able to see your license key. Copy the key, paste in the License Settings of EchoRewards Pro, and press **Activate License.**



This is how it should look if it’s a success.
